

## What can Persax Mosquito Nets do for you?

We all like to enjoy fresh air especially during summer season; the problem is the unpleasant presence of insects that forces us to close different rooms to keep them out.

Thanks to Persax Mosquito nets, you get protection at home without constantly having to close windows and doors, thus stopping the nice air flow.

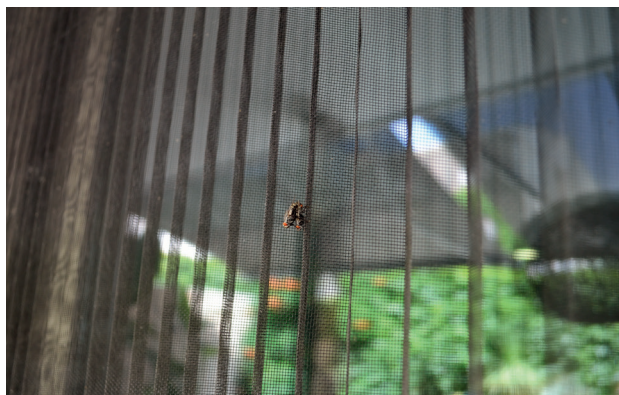

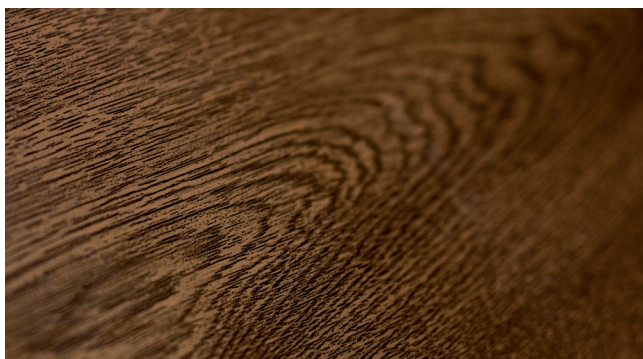

### A WIDE RANGE OF MODELS

Persax offers a wide range of mosquito nets available to meet all needs.

From our most traditional systems, such as fixed and sliding mosquito nets, to the new pleated and roller mosquito nets guided by chain.

### FINISHES AND MATERIALS

The integration of the mosquito net in the environment is essential. That is why Persax offers a wide variety of finishes from RAL standard colours to its collection of wooden coating sheets.

### PHIFERGLASS® FABRIC

The standard fiberglass fabric 18x60 adds protection against insects. It is ideal when traditional protection is required. Colours do not fade out and the mesh stays uniform without any deformation.

The net is manufactured under the most rigorous specifications and requirements in order to provide the highest protection against insects. Thanks to its excellent qualities, it is a long-lasting system which is not flammable.

## MOSQUITO NETS

PLEATED – ROLLING – MOSQUI ZIP – FIXED  
SLIDING – HINGED

## HINGED (DOORS)

It is recommended for outside doors that open from inside. This system is the best solution in the way out to balconies, terraces, and entrance / exit areas.

## PLEATED MOSQUITO NETS

They can cover large areas, up to 3 metres high and unlimited width, making it compatible with all kinds of terraces.

Easily assembled, the fixing plates enable to contain the whole mosquito net into a cassette clipped to these plates, thus making it easy to remove.

**PERSAX MOSQUITO NETS OFFER A WIDE RANGE OF POSSIBILITIES, WHICH HAVE A COMMON POINT: PROTECTION AGAINST INSECTS.**

## FIXED AND SLIDING

It is a convenient, economic and long-lasting system that allows replacing the net at a low cost. The great variety of especial profiles and sealing brushes provide solutions in difficult spaces.

## ROLLING AND MOSQUI ZIP

The rolling system in a box allows the protection of the fabric in winter. Moreover, it is a convenient, practical and long-lasting system, especially recommended for windows.

The ZIP system allows covering large opening spaces, while keeping the net in the guides thanks to the lateral zips.
