NEW MOSQUITO NET PLEATED PANORAMIC

Protection for large spaces

Contemporary architecture demands solutions that can adapt to large glazed surfaces without compromising design, functionality or technical performance.

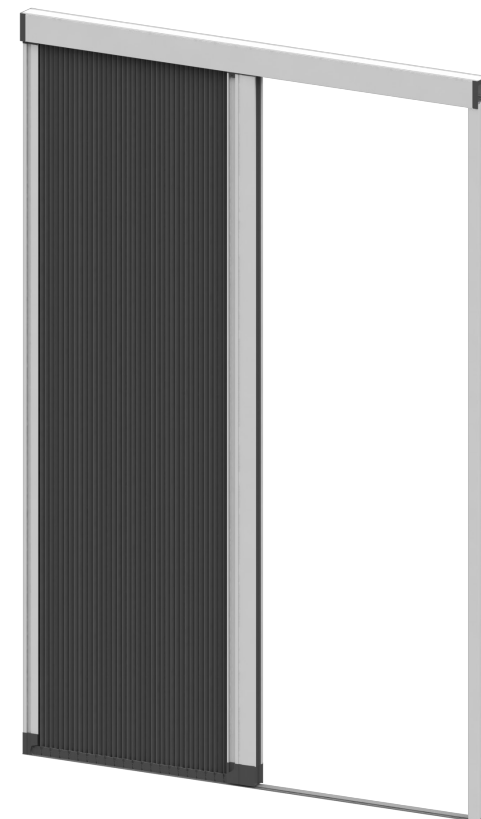

The GD45 PANORAMIC was created to meet this need: a large format pleated insect screen designed specifically to cover wide openings with total structural reliability and a light, integrated aesthetic.

With a capacity of up to 2.90 m wide and 3.50 m high for single panels, and up to 5.80 m wide and 3.50 m high for double panels, the GD45 PANORAMIC allows you to protect large openings without intermediate partitions that fragment the view or limit the entry of natural light.

Its chain pleating system ensures smooth and controlled sliding, providing ease of use even in large-scale dimensions. The 45 mm profile configuration provides stability and strength, ensuring optimal performance in high-traffic or heavy-duty applications.

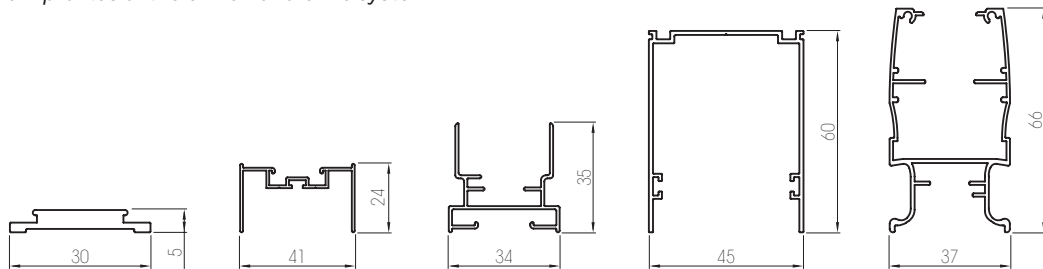

The result is a technical solution that expands design possibilities, allowing visual continuity between indoors and outdoors without compromising insect protection.

GD45 PANORAMIC. The professional solution for large spaces.

MAXIMUM DIMENSIONS

One sheet

Double sheet

MAIN FEATURES

ADAPTATION TO LARGE DIMENSIONS

It is specially designed to be integrated with sliding doors, terrace enclosures, porches and large windows. Spaces where a traditional pleated mosquito net cannot be used.

STRUCTURAL STABILITY

Manufactured in extruded aluminium to ensure durability and resistance.

MINIMALIST AESTHETICS

Its clean, straight lines make this insect screen the perfect addition to modern, minimalist environments.

INTEGRATION WITH JOINERY AND OTHER ELEMENTS

The variety of finishes offered by Persax provides total integration with the window frame and other sun protection elements.

RESISTANT FABRIC

Persax mosquito netting offers high durability and resistance to inclement weather.
