AWARDED PRODUCT

EXTREME
SYSTEM

MAXIMUM SECURITY

The **EXTREME SYSTEM** is able
to resist winds of over
300 km/h

TECHNICAL FEATURES

- Approximative weight:
11,80 kg/m² (VS-150 Block 60)
8,00 Kg/m² (Segur EC-60)
- Tested Width:
VS-150 Block 60: 4,50 m
Segur EC-60: 4,00 m
- Wind Pressure Resistance
(UNE EN 13241-1:2004+A1:2011)
CLASS 5+

AWARDED PRODUCT

Persax EXTREME system was
awarded the first prize in the
category in the Awards by the "Nan
Arquitectura y Construcción" magazine.

EXTREME won in the category for Materials and that for
Construction works in wood, metal, PVC and glass thanks to
its raw quality, features and top-notch security levels.

These awards are divided into two different sections: one
for projects, composed of 6 categories, and another for
construction materials, divided into 11 categories.

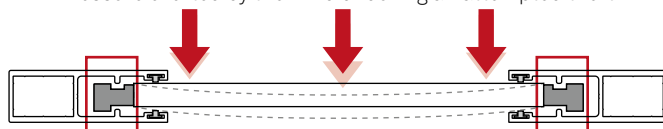

EXTREME SYSTEM

Our security system EXTREME is especially suitable for areas requiring extra security due to high burglary rates or extreme weather conditions. It can resist hurricane winds of over 300 km/h.

Compatible with **VS-150 Block-60** and **Segur EC-60** slats, the Extreme system consists of a special end cap and guide that provide extra strength and security to whole roller shutter door system.

Pressure exerted by the wind or during an attempted theft

The end caps, together with the guide, prevent the slat from being released

WIND RESISTANCE

The system can support winds of over 300 km/h, preventing the slat to take out from the guide.

ECONOMIC BENEFIT

It allows reducing the amount of the insurance bill of the house or local business.

DESIGN

It stands out thanks to its careful design and possibility for multiples finishes, making it suitable to all kind of facades and architectural styles.

EXTREME SECURITY

The VS-150 Block 60 system is also selflocking, which improve its security by preventing the roller shutter hoisting.

CORROSION

Its corrosion treatment makes it optimal in areas with sea exposure and other agents that cause degradation of materials.
